KITCHEN
CUPBOARD FIT

System boilers are more suited to properties with multiple bathrooms, because good flow rates can be maintained if more than one domestic hot water outlet is in use at the same time. The Vision is Vokèra's feature rich system boiler and is the ideal boiler where space is an issue.

SEDBUK A rated and up to 90.2% efficient⁽¹⁾, reducing running costs by up to 35% more than a conventional boiler, helping to safeguard the environment.

5 year parts and labour warranty.

Small dimensions enable the boiler to be sited almost anywhere in the home, including a kitchen cupboard.

Lightweight and versatile flue options, including rear flue option, enables the boiler to be installed easily, even in tight spaces.

The Vision system boilers are for central heating only but can provide for your domestic hot water needs when installed with a water cylinder.

Easy to use control panel ensures simple operation of the appliance.

Adding a Vokèra energy saving control to the Vokèra Vision system can increase the boilers efficiency even further. Ask your installer about the range of Vokèra energy saving controls.

Additional built in functions include: SARA function for automatic temperature control and improved efficiency, anti-cycling for longer lasting component performance and frost protection.

Compatible with Zenith Solar thermal.

Can be converted to LPG with LPG Kit.

Optional pipe cover and rear flue option to ensure a tidy installation.

Vokèra Vision is also available as a combi boiler.

ENERGY SAVING CONTROLS AND ACCESSORIES

Description	Code
RF Room thermostat control	TBC
OpenTherm wireless RF control*	611
Weather compensation control*	2359529
Control interface*	29450143
