THE NEW 2020 VISION PLUS

Look at the all new Vision Plus range of combi and system boilers

COMBI & SYSTEM | 7 MODELS | 20 – 40KW

Rated **'Excellent'** on  **Trustpilot**

See for yourself

The all new **Vision Plus** range retains all the features of its predecessor but adds many more. Now a range of seven models, four combi and three system. With a 7 year warranty as standard, a universal pipe layout for easy replacements and now with outputs up to 40kW, the 2020 Vision Plus is a clear winner.

Combi boilers

Vision Plus has four combi models in the range: 25, 30, 35 and 40kW. The new Vision Plus combis offer complete flexibility in installation and performance.

The 25C and 30C have small installation footprints, with dimensions of just 738 (h) x 405 (w) x 248mm (d). The rear flue option makes it easy to fit these in to kitchen cupboards. They are also lightweight too, at just 27kg for the 25C.

The 35C and 40C are all about performance. Both models are still comparatively compact in size at

740 (h) x 420 (w) x 350mm (d). The 35C delivers a domestic hot water (DHW) flow rate of 14.2 l/min at 35°C temperature rise and the 40C 16.4 l/min. The wide modulation ratio of 1:8 means the 40C can provide a minimum of 4.9kW for heating and the 35C just 4.4kW. This ensures that boiler cycling is reduced, even when the central heating load is minimal.

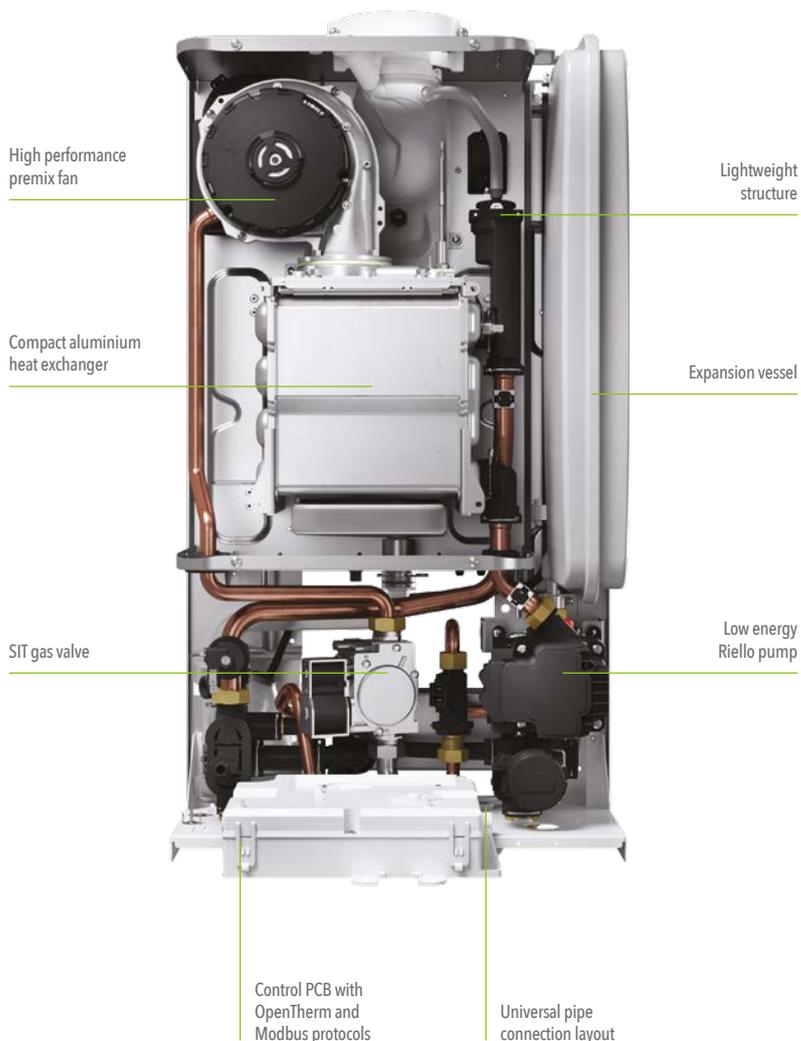

System boilers

To complement the combi models, there are three system (heat only) models in the range: 20, 25 and 30kW

These boilers can provide central heating only or be match with Vokèra AquaFlow unvented cylinders to provide domestic hot water storage. Again, a wide modulation ratio ensures flexibility and efficiency and, thanks to the Modbus protocol, the entire Vision Plus range is designed to be 'hybrid ready' for integration into low carbon heating system designs.

For further flexibility, all system models boast a built-in relay, which allows for easy integration with zone valves.
